

## Discussion Topics during 2010 HMORN Conversation Café

1. Dissemination and Translation Techniques to Facilitate Implementation of Evidence-Based Interventions and the Use of CER by Patients, Clinicians, Payers, and Others.  
**Facilitators:** Russell Glasglow and Marcia Ory
2. Genomics and Personalized Medicine Research in the HMORN  
**Facilitators:** Robert Davis and Cathy McCarty
3. Community Engagement  
**Facilitator:** Sarah Greene
4. Cluster Randomized Clinical Trials: Potential for Application within the HMORN  
**Facilitators:** Richard Platt and Elizabeth Loggers
5. Comprehensive Care Coordination and Transitional Care Programs Used in Managing Children and Adults with Severe Chronic Disease. Sub themes: CER and health disparities.  
**Facilitator:** Angie Hochhalter
6. Screening Technologies in Preventing Colorectal Cancer. Sub themes. CER. Fecal immunochemical tests and computed tomography [CT] colonography verses usual care (fecal occult blood tests and colonoscopy)  
**Facilitator:** Bob Fletcher
7. Community Practice-based Screening for Breast Cancer in High-Risk Women of Different Ages, Risk Factors, and Race or Ethnicity. Sub theme: Compare the effectiveness of film-screen or digital mammography alone and mammography plus magnetic resonance imaging (MRI).  
**Facilitator:** Suzanne Fletcher
8. Patient Decision Support Tools on Informing Diagnostic and Treatment Decisions (e.g., treatment choice, knowledge acquisition, treatment-preference concordance, decisional conflict) for elective surgical and nonsurgical procedures-especially in patients with limited English-language proficiency, limited education, hearing or visual impairments, or mental health problems. Sub theme: CER  
**Facilitators:** Kathy Mazor and David Arterburn
9. Critical Care Outcomes Research. Sub themes: Delirium, Sleep, CER.  
**Facilitator:** Shirley Jones
10. Health Economics  
**Facilitator:** Tom Miller
11. Diabetes Prevention and Treatment.  
**Facilitators:** Joe Shelby and Nancy Sherwood
